Nym Squad League | Season 0

The Squad Wealth Fund Wallet
can be found [here](#).

Nym Squad League soft launched in January 2024 with 'Season 0: Dawn of the Nymja', which came to a close at the end of March.

The league takes rewards generated from the official Nym Nodes Delegations Program and puts it into a community treasury called the **Squad Wealth Fund**. Rewards are redeemed and distributed from this treasury to the Nym ecosystem on a quarterly basis for outstanding contributions.

This report provides an overview of what was achieved in Season 0 of the Nym Squad League and the latest numbers from the Squad Wealth Fund.

We are looking forward to opening Season 1 to Nymsters very soon, welcoming even more community members to the program!

Squad Wealth Fund overview

Nym's core team delegated 30,250,000 NYM to 121 community-run independent mixnodes, staking 250,000 NYM on each node as part of the Nym Delegations Program.

Nodes were selected based on their operators' contribution and involvement within the ecosystem, and importantly, their node parameters, location and performance. By delegating NYM tokens with independent operators, we enhance the reputation of the nodes and advance toward a more robust and decentralized ecosystem. A transparency dashboard of the delegation program will be released to the community shortly.

During season 0 of the Squad league, the Nym Squad Wealth Fund accumulated 475,256 NYM in staking rewards. These funds are now part of the community treasury to be distributed to Nym Squad League participants across various seasons.

Season 0 of NSL saw a total of 151,200 NYM distributed amongst Nymjas, Shinobis and their squads for contributing to core objectives.
